

Instructions For Using Oil Pharm Concentrate:

Mix 10 tablespoons of concentrate per gallon of water for Dormant Oil and 4 tablespoons per gallon of water for Summer Oil.

Water well in the AM, day of treatment. Late in the day, as close to dusk as possible, spray a fine even mist of Oil Pharm dilution on leaves, top and bottom, stems and in the case of blackspot, the soil surrounding the plant base.

Please TEST, TEST, TEST.

Please tell us your success stories.

Best regards,

The Staff at Pharm Solutions Inc.
